Professional Summary

Frontend Software Engineer with 4+ years of experience building scalable React.js and TypeScript , Javascript applications across fintech and telecom domains. Experienced in developing accessible, responsive, and high-performance user interfaces with reusable component architectures, RESTful and GraphQL API integrations, and modern frontend tooling. Skilled in collaborating with backend engineers, QA teams, and product stakeholders to translate business requirements into scalable technical solutions. Strong focus on performance optimization, maintainable code, frontend security practices, Agile delivery, and delivering predictable, high-quality releases.

Technical Skills

Frontend	React.js, TypeScript, JavaScript (ES6+), Next.js, HTML5, CSS3
State Management	Redux Toolkit, React Hooks, Context API
UI/UX	Responsive Design, Tailwind CSS, Chakra UI, Bootstrap
Testing	Unit Testing, Integration Testing, Accessibility Testing
Accessibility	Semantic HTML, ARIA, WCAG 2.1 AA
APIs	RESTful APIs, GraphQL APIs, API Integration
Dev Tools	Git, GitHub, CI/CD, Agile, Docker
Performance	Code Splitting, Lazy Loading, Caching, Frontend Optimization
Other	Node.js, MongoDB, MySQL Secure SDLC, Reusable Component Libraries

Professional Experience

Software Engineer | Frontend Developer (React.js) – OPG Metals & Finsec Limited (Arthdhara) | Dec 2024 – Present

- Owned frontend delivery of loan management and borrower-investor workflow features within a fintech platform.
- Implemented frontend performance optimizations including lazy loading, code splitting, and caching strategies.
- Collaborated with backend engineers, QA teams, UX/UI designers, and product stakeholders to align API contracts and integration requirements.
- Translated complex business requirements into scalable and maintainable frontend solutions using React.js and Redux Toolkit.
- Participated in sprint planning, code reviews, release coordination, and Agile ceremonies to improve delivery predictability.

Software Engineer – Frontend Developer – CreditTech Solutions Private Limited (AlphaMoney) | Aug 2022 –Nov 2024

- Built scalable and accessible React.js applications using semantic HTML, responsive design principles, and reusable component architectures.
- Developed fintech workflows and integrated RESTful and GraphQL APIs to support lending and investment platform functionality.
- Managed complex client-side state using Redux Toolkit, React Hooks, and Context APIs.
- Worked closely with cross-functional Agile teams to deliver secure, reliable, and user-focused frontend solutions.
- Enhanced user experience and application performance through frontend optimization strategies.

Frontend Developer – Aerial Telecom Solutions & Private Limited | Aug 2021 – Aug 2022

- Developed responsive dashboards and internal telecom tools using React.js, Redux, and JavaScript.
- Collaborated with backend teams and testers to resolve defects and deliver stable user interfaces with low failure rates.
- Participated in code reviews, sprint planning, and Agile delivery processes.
